

# Auth0 - SMS INTEGRATION

## How To Get Started

Auth0 provides a drop-in solution to **add authentication and authorization services** to their clients' applications. Mitto provides an SMS messaging service that can be used by Auth0 customers to **deliver multi-factor verification** via text messaging.

Mitto is integrated through independent app – custom SMS activity that can be downloaded from Auth0 Marketplace.

## PART 1

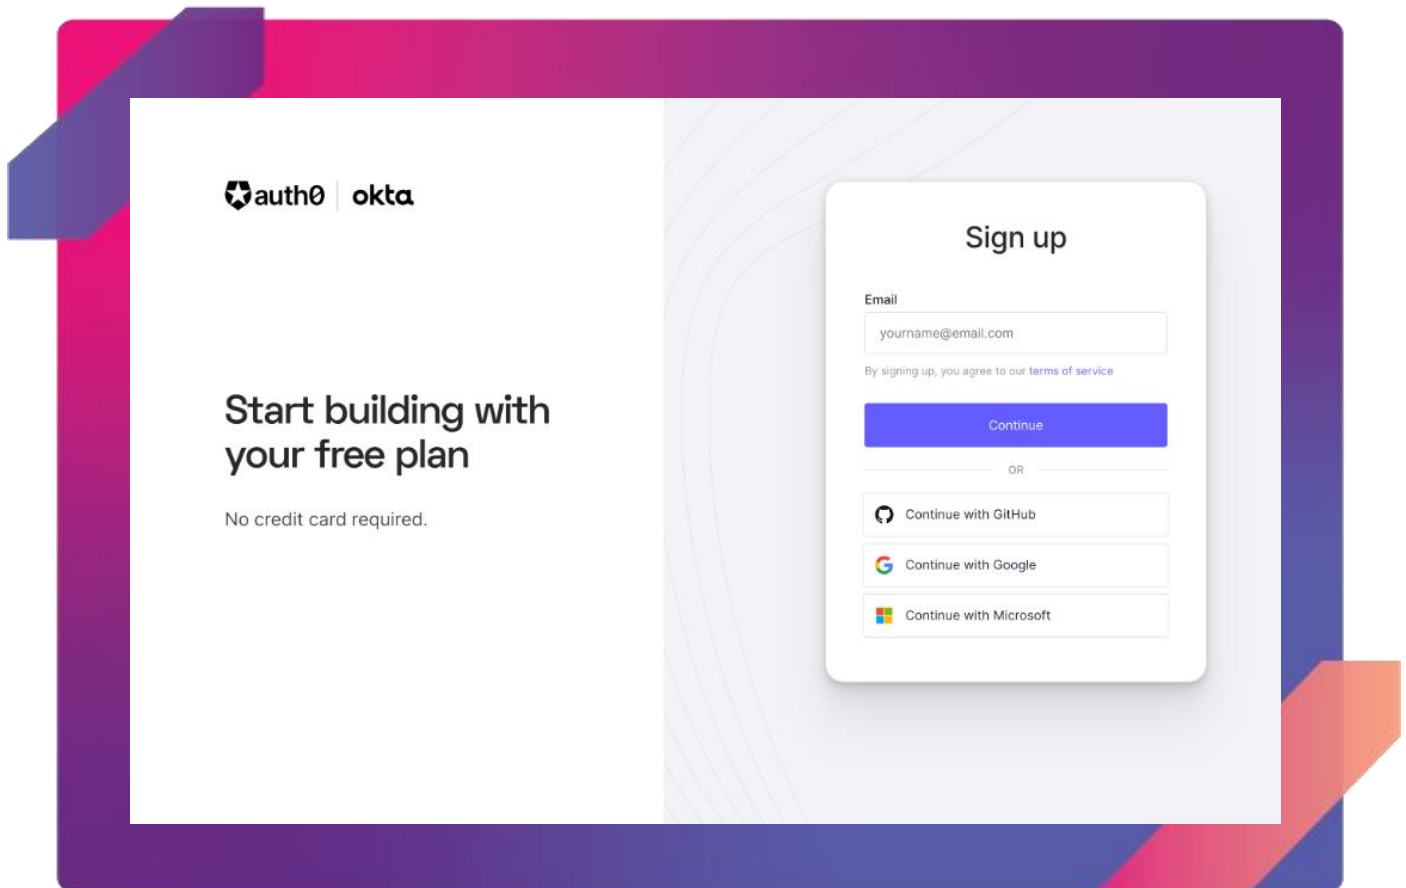

# AUTH0 MARKETPLACE

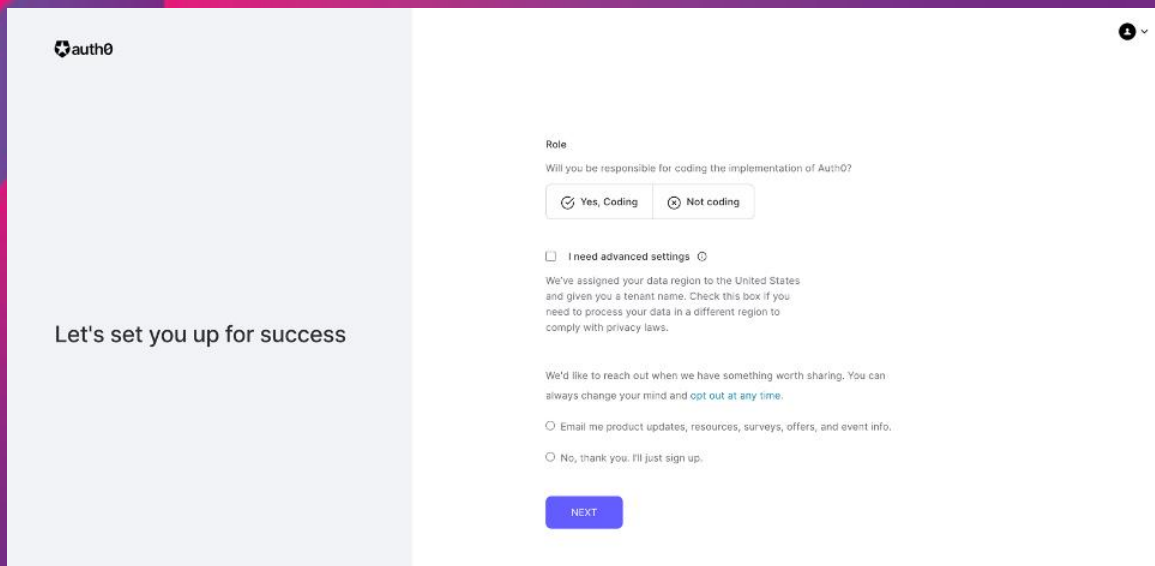

### Prerequisites:

- Auth0 account
  - **Mitto account:**
    - **Guide – [How to create Mitto account](#)** and find API key
- 

### Steps:

- If you don't have an Auth0 account, please go to signup page to create it.

**auth0**

Let's set you up for success

Role

Will you be responsible for coding the implementation of Auth0?

☒ Yes, Coding ☐ Not coding

☐ I need advanced settings

We've assigned your data region to the United States and given you a tenant name. Check this box if you need to process your data in a different region to comply with privacy laws.

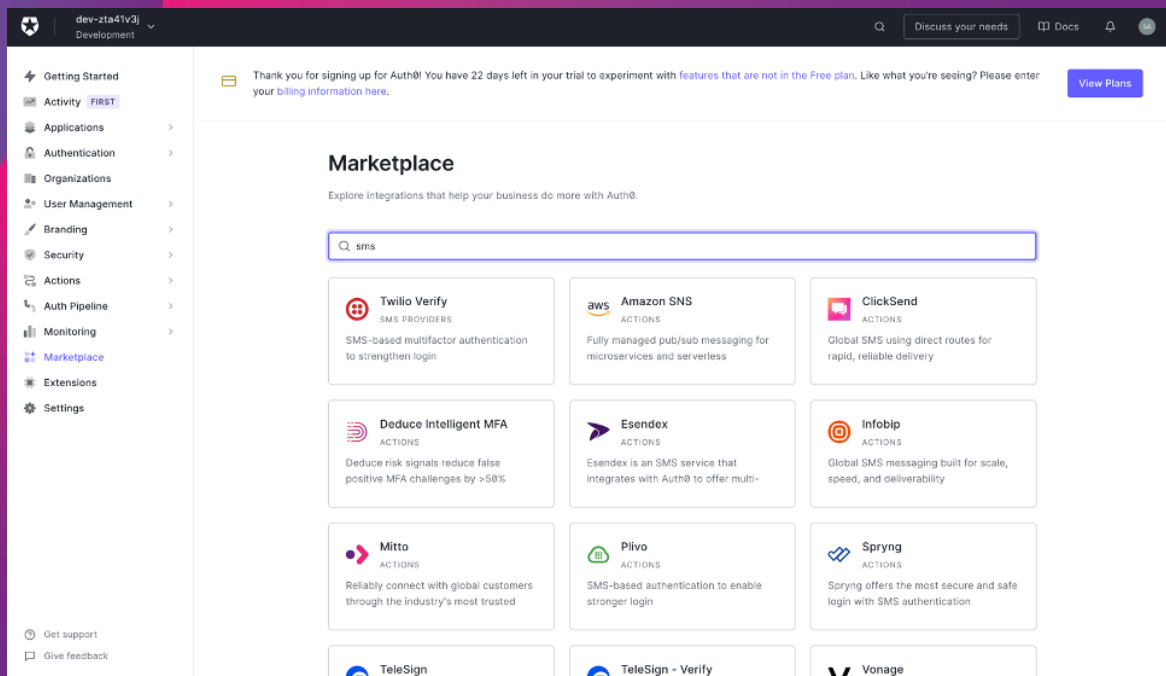

We'd like to reach out when we have something worth sharing. You can always change your mind and [opt out at any time](#).

☐ Email me product updates, resources, surveys, offers, and event info.

☐ No, thank you. I'll just sign up.

**NEXT**

- When you land to your Auth0 account, go to Marketplace, search “sms”

dev-zta41v3j Development

Thank you for signing up for Auth0! You have 22 days left in your trial to experiment with [features that are not in the Free plan](#). Like what you're seeing? Please enter your [billing information here](#).
