

HOW TO CREATE ACCOUNT

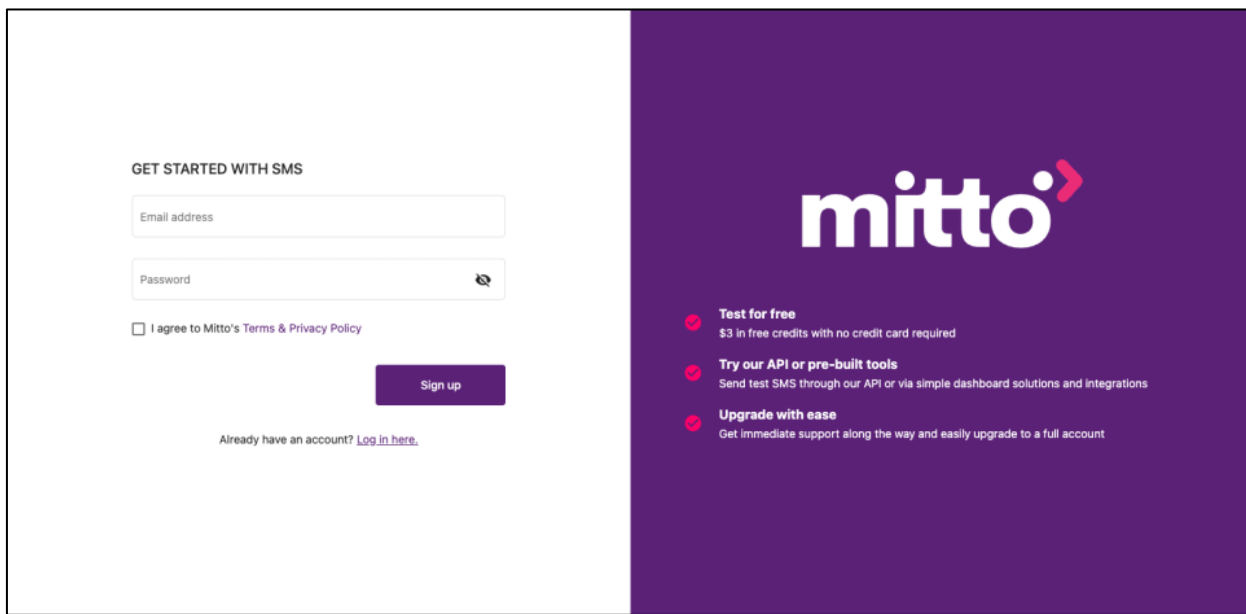

WE MAKE COMMUNICATIONS HAPPEN

SETUP

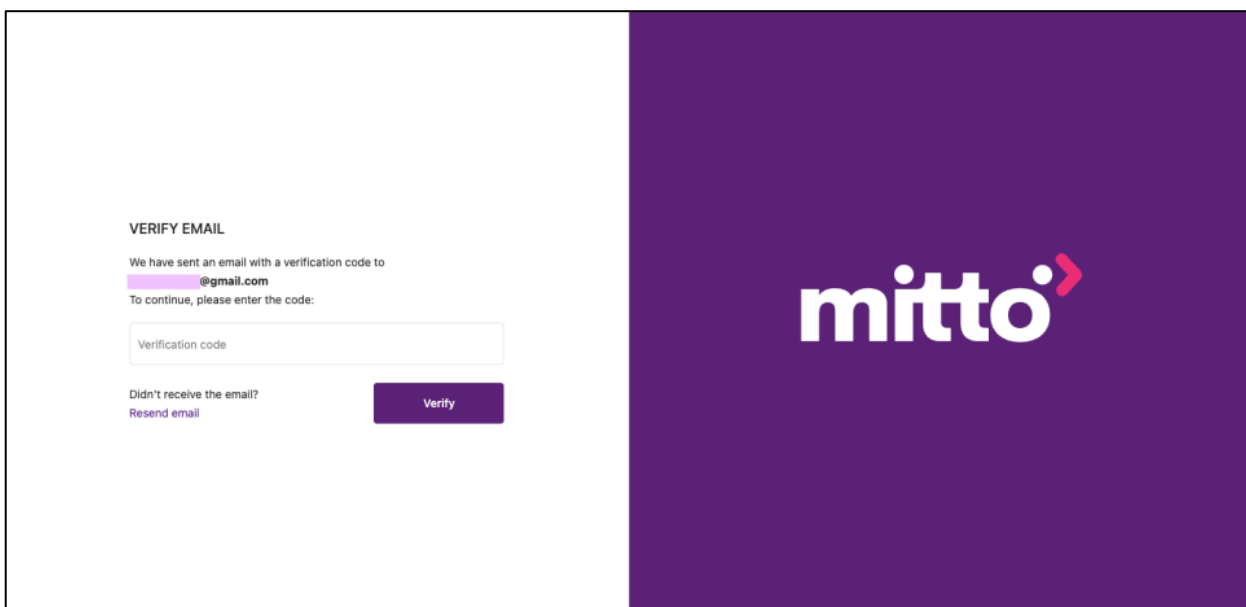

Go to <https://dashboard.mitto.ch/signup> to create your account.

- Enter your email and choose a password

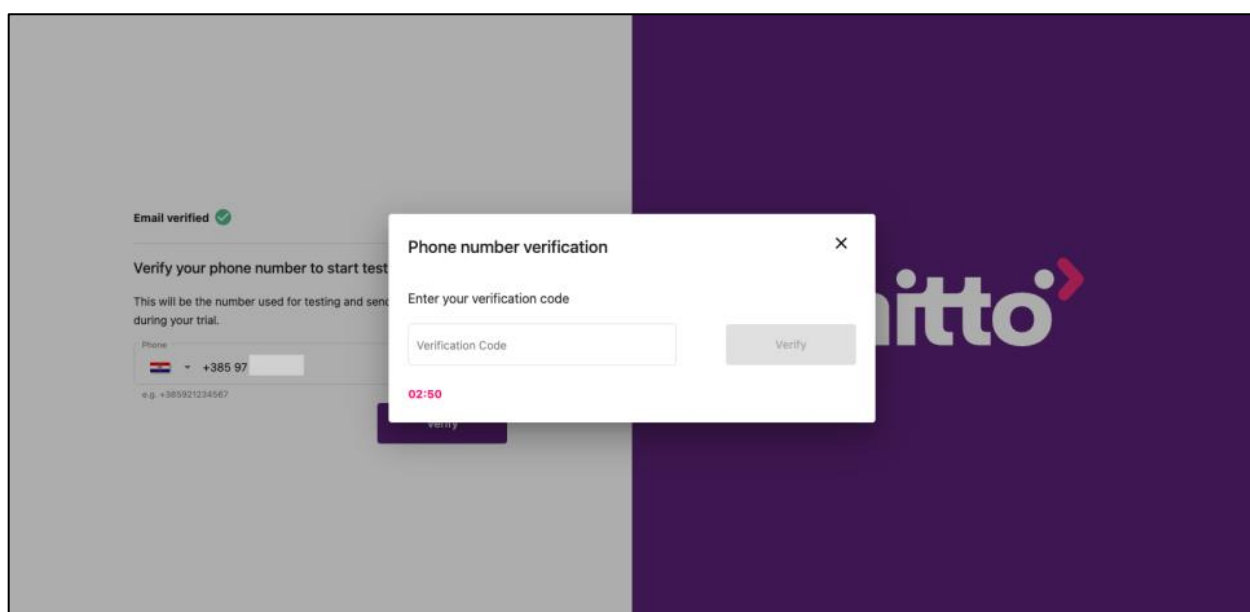

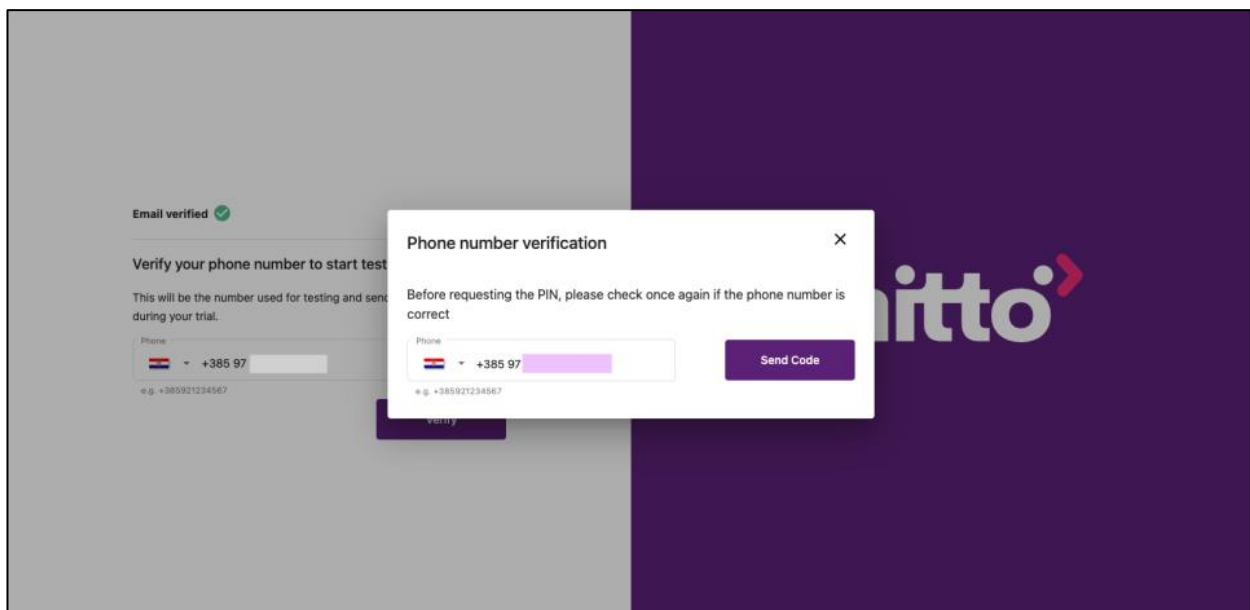

The screenshot shows the Mitto signup page. On the left, under the heading "GET STARTED WITH SMS", there are two input fields: "Email address" and "Password". Below the password field is a checkbox labeled "I agree to Mitto's Terms & Privacy Policy". A "Sign up" button is positioned below the checkbox. At the bottom of the form, a link says "Already have an account? [Log in here.](#)". On the right, the Mitto logo is displayed above three bullet points: "Test for free" (\$3 in free credits), "Try our API or pre-built tools" (send test SMS), and "Upgrade with ease" (get immediate support).

- We will ask to **verify your email**

The screenshot shows the Mitto email verification page. On the left, under the heading "VERIFY EMAIL", it states: "We have sent an email with a verification code to [redacted]@gmail.com. To continue, please enter the code:". Below this is a "Verification code" input field. At the bottom left, there is a link: "Didn't receive the email? [Resend email](#)". A "Verify" button is located at the bottom right. On the right, the Mitto logo is displayed.

- After email verification, we will need to **verify the phone number** that will be used to test messages.
 - You can **receive messages during the trial period only to this number**. The sender is always fixed: „SMSInfo“.
 - Pop-up will not be blocked by the browser, it works on desktop and mobile.

- The last step is to **create a full profile**. If you want to connect Mitto with another platform, choose it under Integrations. You will be able to send messages from that platform (e.g. Zoho, Shopify, HubSpot) and more.

Phone number verified 

Almost finished! Let's create your profile...

Integration

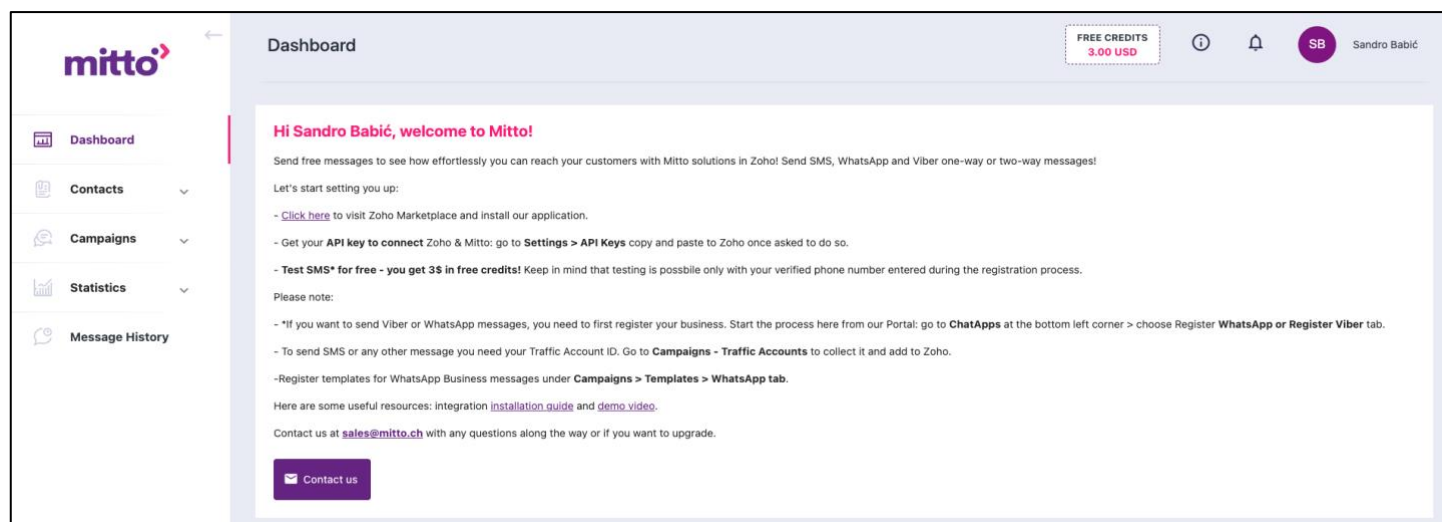

Choose an existing Zoho, Hubspot, or other integration to be guided through the Mitto Campaign Manager. 

Let's get started

SEND FREE SMS TEST MESSAGES AND INTEGRATE WITH OTHER PLATFORMS

- This account starts as a **free trial with some credits** to try sending SMS messages via our solutions: Campaign Manager or via API.
- If you will use Mitto as an integrated solution in various platforms (Zoho, Shopify, HubSpot, etc.), you need to **take API key from our platform** and paste it to your account once asked to do it. All needed instructions for each integration will be on your Mitto homepage **along with guides**.

WHERE TO FIND API KEYS

Go to Preferences in the main menu or use the tile on your home screen, and find API keys that you need. Copy and paste your API keys – use HTTP (for SMS) or ChatApps (for WhatsApp, Viber, etc.).

Your API keys

Copy and paste when necessary

In case you are using SMS, copy and paste your HTTP API key.

.....

In case you want to use ChatApps applications such as WhatsApp and Viber, copy and paste your ChatApps API key.

[View API keys](#)

GET STARTED WITH CHAT APPS: REGISTER YOUR ACCOUNTS VIA MITTO PORTAL

If you wish to use **chat apps**, you need to register accounts first. You can **initiate this registration process from Mitto portal**. Go to Home and use tiles for a channel of your choice and fill the form you need (like WhatsApp or Viber). Our team will then get in touch to finalize the process with you.

The screenshot displays the Mitto Customer Portal registration interface. At the top, a large tile titled 'Hello Maja' welcomes the user and provides instructions on creating, targeting, launching, and tracking omnichannel campaigns. It offers a choice between a user-friendly interface and an API (HTTPS for SMS or ChatApps). To the right, a 'Your API keys' section allows users to copy and paste their HTTP API key, with a 'View API keys' button. Below these are six smaller tiles for registration: 'RCS' (Next generation messaging), 'WhatsApp' (Rich and secure messaging), 'Viber' (Personalized connections), 'Sender ID' (Set it up here), 'Documentation' (User guides), and 'Contact us' (Reach out support). Each tile includes a brief description and a 'Register' button. The 'Contact us' tile features a text input field for the user's message and a submit button.

Here is a separate guide on [how to create WhatsApp templates](#) in Mitto portal.
