VERIFICATION

KEEP CUSTOMERS SAFE AND YOUR BUSINESS SECURE

Verify new users, secure accounts and transactions, and build trust with two-factor authentication and one-time passcodes

Let's Get Started!

AUTHENTICATING CUSTOMER ACCOUNTS HAS NEVER BEEN FASTER

Two-factor authentication enables customers to quickly confirm their identities through their mobile device, keeping bad actors off your platform. This simple solution can reduce fraudulent activity by up to 100%.

VERIFICATION IS A NO BRAINER

Our multi-layered security approach has customers verify their identity in multiple ways so you know every customer is exactly who they say they are

PROTECT YOUR CUSTOMERS

90% of passwords can be cracked in six hours. Two-thirds of people use the same password for all logins. Keep customers safe by ensuring no one else logs into their account.
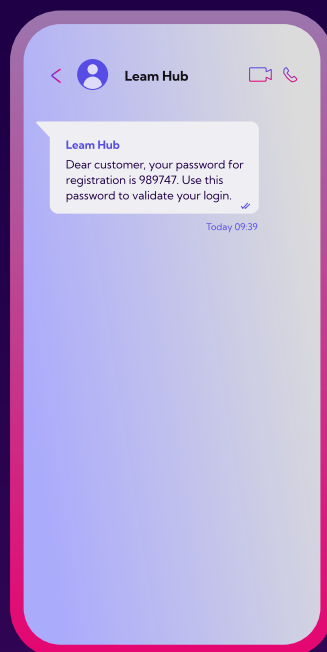

PROTECT YOUR BUSINESS

Bots and fraudulent accounts are rampant online, costing companies millions of dollars every day. Make sure that only your customers have access to your business.

Increase conversions

Lower acquisition costs

Prevent fraud

Reduce churn

Build customer trust

TWO-FACTOR AUTHENTICATION KEEPS YOUR BUSINESS SAFE

VERIFY USERS

Keep fake bot accounts out by giving every new user an immediate, secure one-time verification code to make sure they're real

AUTHENTICATE TRANSACTIONS

Prevent fraud and comply with consumer protection regulations by having customers confirm transactions with two-factor authentication

PROTECT ACCOUNTS

Verify that logins from new devices or locations are from your customers, so that they never have to worry about who's accessing their account

TWO WAYS TO INTEGRATE

You've got options! We can manage the whole process [2FA] or give you the tools to do it yourself [OTP]

[2FA] TWO-FACTOR AUTHENTICATION

Our 2FA API generates codes, sends them to your customers, and verifies for you making it easy to get started with multi-factor authentication.

- SMS API
- Voice API [Text-to-Speech]
- SDK [PHP, Java, and more]
- Mobile + Landline Number Verification
- Multi-Language Support
- Custom Passcode Generation
- Custom Passcode Length
- Custom Message Templates

[OTP] ONE-TIME PASSCODES

Take control of the verification process by generating and verifying codes yourself. We'll handle the messaging.

- Channel APIs
- SDK (PHP, java, and more.)
- Mobile + Landline Number Verification

WE MAKE VERIFICATIONS HAPPEN

Our multi-factor authentication process is best in class, ensuring your customers can always access their accounts

Global Reach
With direct connections to mobile carriers in nearly every country, we'll reach your customers no matter where they are

Easy integration
Our detailed documentation and helpful support team will ensure you get up and running with verification in no time

Ensure Delivery
Even if a text message can't be delivered, we use fallback options like text-to-speech to make sure codes gets through

Intelligent Routing
We evaluate our message routes in real-time so that your messages always get where they're going

Multiple Ways to Verify
From SMS to text-to-speech, choose which verification method works best for your customers
